## PROJECTS

### **Wanderlust Website**

Developed a comprehensive platform for travel enthusiasts to explore destinations, read detailed descriptions, and access user reviews and ratings. Using Node.js, Express, and MongoDB, JavaScript, EJS, HTML, and CSS to create an interactive and user-friendly interface.

**Link :** <https://listing-project-46xr.onrender.com/listings>

### **Simon Says Game**

Created a digital version of the classic "Simon Says" game using HTML, CSS, and JavaScript. Focused on enhancing user engagement through interactive gameplay and responsive design.

**Link :** <https://noopur-thombare.github.io/Simon-Game>

### **Smart Blind Stick**

Developed an Arduino-based smart stick integrated with an ultrasonic sensor, water sensor and an LDR sensor. Implemented a buzzer alert system to enhance safety and navigation for visually impaired individuals.

### **Number plate recognition system using MATLAB**

project focuses on automatically detecting and extracting the number plate from a vehicle image. The primary goal is to locate the number plate region and then extract it for further processing.

## EXTRACURRICULAR ACTIVITIES

- Active member of college Mozilla Campus Club Technical team
- Participated in GirlScript Summer of Code'24
- Actively engaged in club activities like MOZFEST, Mozilla-Website, HactoberFest'24
